

Yongren (永仁) Fellowships to PROMYS

Program in Mathematics for Young Scientists

Challenging Online Summer Program in Mathematics at Boston University in U.S. July 4 - August 14, 2021

Professor Glenn Stevens, Director Professor Li-Mei Lim, Executive Director

Full Scholarships for Mathematically Talented Students in China Aged 14-18

Interested in joining mathematically talented high school students from across the U.S., undergraduate counselors, faculty, research mentors, and guest mathematicians for PROMYS's 33rd summer of intensive mathematical exploration?

- PROMYS seeks to encourage mathematical habits of mind that support curiosity, creativity, collaboration, and independence in facing unfamiliar mathematical challenges.
- Students receive daily feedback from their counselors on their Number Theory problem sets.
- Advanced seminars, daily Number Theory lectures, exploration labs, mentored research, and dozens of mini-courses and guest lectures on a wide range of mathematical topics.
- Fellowships designed for students who need financial assistance to participate in PROMYS.
- Approximately 50% of PROMYS alumni go on to earn doctorates.

Apply by March 15, 2021: www.promys.org

Applicants should allow time to work on the intriguing application problems.

"PROMYS is about learning a way of thinking, it is about exploring math on your own, it is about doing math with the friend you just made who comes from across the world and more beyond that." Qianyun Zhou, Yongren Fellow to PROMYS 2019 and 2020

Boston University is an equal opportunity, affirmative action institution

We gratefully thank the foundation which funds the Yongren Fellowships and our other sponsors and partners: American Mathematical Society, Boston University, Clay Mathematics Institute, Indira Foundation, Linde Family Foundation, Morph.org, the Nash family, PROMYS Foundation, and private donors.
