Intensive Immersion in Mathematics

June 29 – August 9, 2025 on the campus of Boston University

Interested in joining mathematically ambitious high school students, counselors, research mentors, faculty, guest lecturers, and visiting alumni for six weeks of joyful and rigorous mathematical exploration?

PROMYS seeks to encourage mathematical habits of mind that support curiosity, creativity, collaboration, and independence in facing unfamiliar mathematical challenges.

There are daily Number Theory lectures, exploration labs, advanced seminars, mentored research, and dozens of minicourses and guest lectures on a wide range of mathematical topics.

Students receive daily feedback from their counselors on their Number Theory problem sets.

Now in its 36th year, PROMYS aims to foster interaction between the PROMYS community and the larger community of research mathematicians and scientists working in academia and industry.

Apply by March 3, 2025: www.promys.org

- Generous Financial Aid: Full and partial aid available to any family for whom cost is a barrier.
- PROMYS is FREE for U.S. families whose annual income is under \$80,000. (Financial aid for international students is considered on a case-by-case basis.)

Alumni tell us two things at PROMYS had a profound long-term impact on them: the math & the people.

"I never realized how much I loved math until I came to PROMYS." Maggie Shen (PROMYS 2024)

"PROMYS is a life-changing experience that has opened up my eyes to many higher fields of mathematics." Timothy Li (PROMYS 2024)
