

# PROMYS

Program in Mathematics for Young Scientists

Professor Glenn Stevens, Founder and Director

## Counselor Opportunity for Undergraduate Mathematics Majors

**Residential mathematical immersion at Boston University: June 21-August 8, 2026**

An intensive summer program for mathematically talented high school students,  
**PROMYS is also designed for the mathematical development of its counselors.**

- Immerse yourself for seven weeks in challenging and collaborative mathematics.
- Act as a mathematical mentor and role model, supervising the work of 3 or 4 high school students.
- Take advanced seminars and engage in mentored research on a variety of mathematical topics.
- Advance your mathematical knowledge through counselor-led seminars and minicourses.
- PROMYS creates an inspiring mathematical community of high school students, undergraduate counselors, faculty, research mentors, visiting mathematicians and guest lecturers.
- Founded in 1989, PROMYS has a large and involved alumni community.
- 77% of counselor alumni go on to earn a doctorate of which 80% are PhDs in mathematics.

**Counselors receive a 7-week stipend of \$5,750, plus free room and board.**

Hiring decisions made on a rolling basis starting February 1, 2026. Applications accepted through March 15.

**APPLICATION: [WWW.PROMYS.ORG](http://WWW.PROMYS.ORG)**

*"Many counselors, myself included, found that PROMYS reminded them of why they love math!"*  
 Juliet O. (Counselor 2024, 2025)

*"Every student and counselor leaves the program inspired by the beautiful mathematics they were exposed to and the exceptional people around them with the burning desire to learn a lot more mathematics."* Haran M. (Counselor 2025)
